MATERIAL HANDLING

stronger together

# Toyota quality with added affordability

## Why choose pre-owned?

Pre-owned equipment from Toyota can help your material handling fleet meet the changing needs of your business. Whether you are looking for a truck to meet an occasional need, or as a back-up to your existing fleet; reliable, low-cost equipment from Toyota can be the answer.

## Why choose Toyota?

One careful owner – us

Toyota has a global reputation for quality and innovation. Our BT and Toyota brand products are the culmination of over 100 years of experience in the materials handling industry. Our pre-owned equipment allows you to buy or rent some of the safest, most reliable and durable counterbalance and warehouse equipment on the market.

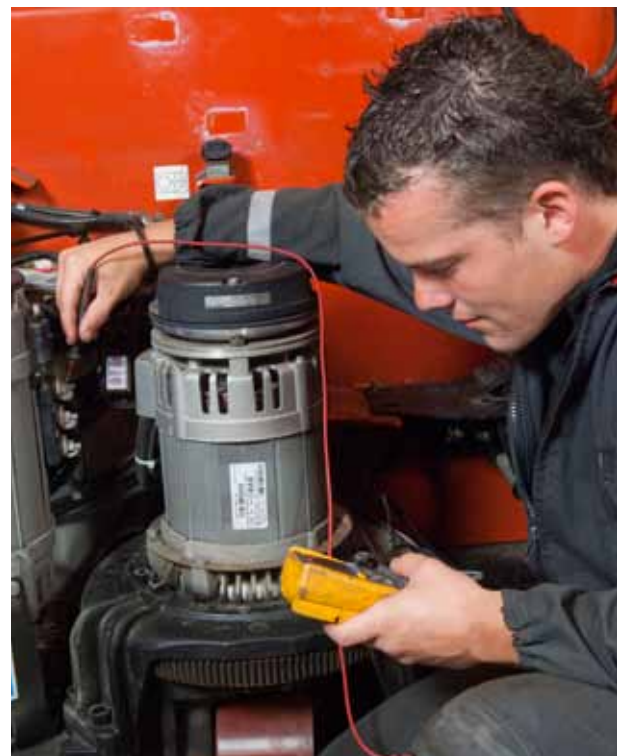

All our pre-owned equipment comes from our contract hire fleet, so it has been maintained by us, from new, by fully trained Toyota technicians, using genuine manufacturer's parts. Our guaranteed uptime promise to our rental customers means we are committed to keeping our fleet in the best possible condition with regular preventative maintenance.

From our contract hire fleet, we only select the equipment for resale that will offer our customers the best value and highest quality. This allows you to benefit from the safety, quality and innovation of BT and Toyota equipment, but at a saving of over 40% compared to a new truck.

**Contact Toyota today to arrange a free site survey or demonstration.**

## Service excellence

Because everyone's needs are different, Toyota offers complete flexibility with a range of service options. You simply select the level of support that is right for you and we will tailor an agreement to meet your needs. And should your needs change, your service plan can be changed to match.

# Not every truck makes it

We only select the best equipment from our contract hire fleet. It must meet stringent quality and safety standards before being considered for overhaul and resale.

Specialist engineers carry out a multi-point check of all major components to ensure the truck meets our quality standards. It is then graded and prepared to one of three finish levels, Silver, Gold or Platinum at our UK workshops.

All machines are fully inspected and serviced using genuine manufacturer's parts:

- Brakes are inspected
- Inspection and servicing of engine and transmission assembly
- Lifting chains and forks inspected in-line with POWER and LOLER regulations.

## Finish Levels

### Silver

Silver level trucks provide exceptional value for money without compromising reliability. They are perfectly suited to less intense operations or as a back-up to your main fleet.

- All functions tested for operation to manufacturer approved tolerances.
- Paint refresh and new safety decals.
- One month or 100-hour parts and labour warranty.

### Gold

Gold level trucks strike the perfect balance between reliability and value for money. They are rigorously inspected and key parts replaced with new.

- All functions are tested and defective parts replaced with new, genuine manufacturer's parts.
- Re-painted in original colours with new safety decals
- Six month or 500-hour parts and labour warranty. 12-month warranty on battery and charger for electric trucks.

### Platinum

Platinum trucks are as close to "new" as possible, ensuring they are the best fit for your business. If you have a more intensive application, a Platinum truck is the ideal choice.

- Detailed inspection of all components, with any defective parts replaced with new, genuine manufacturer's parts.
- Full re-spray complete with original decals.
- Electric models are supplied with a new battery and refurbished charger
- Twelve month or 1000-hour warranty, plus five-year manufacturer's battery warranty and a two-year charger warranty for electric trucks.

# Built to go on working

Toyota and BT equipment is built to last. The Toyota Production System and stringent quality standards ensure we offer our customers some of the most durable trucks on the market.

## Environmental commitment

Toyota's European production centres are all ISO14001 certified and demand strict environmental standards from suppliers. The Toyota Production System ensures that we focus on eliminating waste and reducing the use of resource at all stages of the production process.

This ethos continues to our UK based workshops where our pre-owned equipment is prepared for the next stage in its working life.

## Flexible Finance and Rental

More and more companies are choosing flexible rental and finance options from Toyota. Customers who choose pre-owned equipment can choose from a range of contract plans, with options to amend the fleet and the agreement if business needs change. This means you can benefit from using a reliable piece of equipment, whilst protecting the capital in your business.
